

Tiny Home for MINI BEASTS

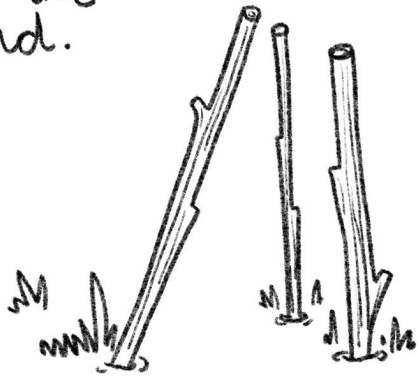

Welcome INSECTS and BUGS into your garden by providing a safe and cosy place for them to reside. You can COLLECT most of the materials from your GARDEN or when you are on a WALK in the COUNTRYSIDE.

YOU WILL NEED ~

- 3 sticks - roughly the same length
- String OR garden twine
- A selection of the following:-
 - stones OR rocks
 - twigs
 - pine cones
 - bark
 - dried leaves
 - straw
 - moss

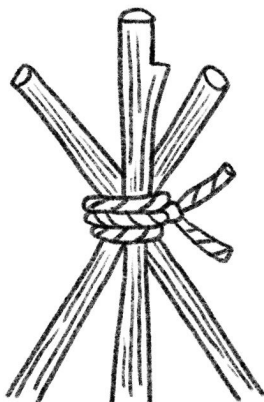

1 Find a SHADY, COOL area in your garden and push the 3 sticks into the ground.

3 Lean more TWIGS and bark onto the OUTSIDE of the pyramid. Place STONES or ROCKS at the base to keep everything in place.

2 Tie the sticks TOGETHER at the top with the STRING or GARDEN TWINE.

4 Fill the PYRAMID shape with all your FOUND MATERIALS. Leave a few gaps so the bugs can BURROW.
