

# time to CREATE...

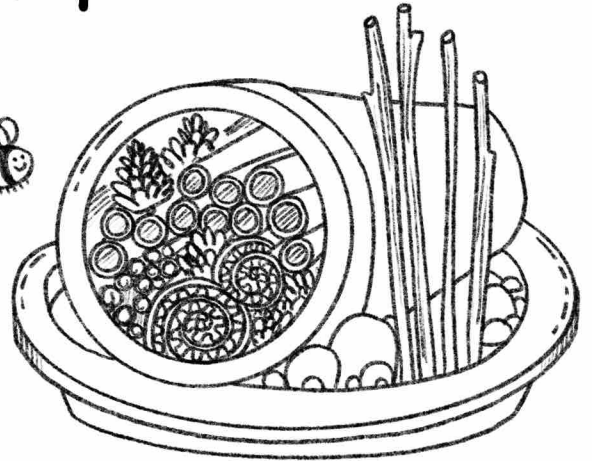

# a BEE HUT

## Virtual Day Trips

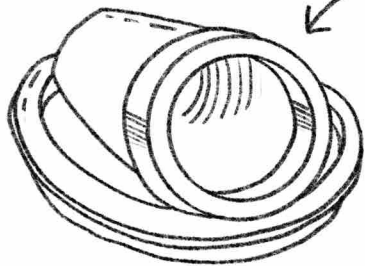

You will need:

- a Plant Pot
- a Plant Pot Saucer
- Corrugated Cardboard
- Natural Materials
  - Twigs
  - Stones
  - Bamboo
  - Dried leaves
  - Pine cones

OR anything else you can find in the garden

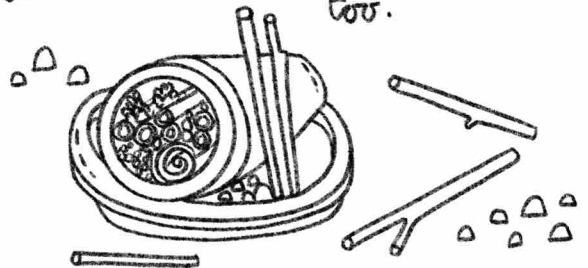

### STEP ONE

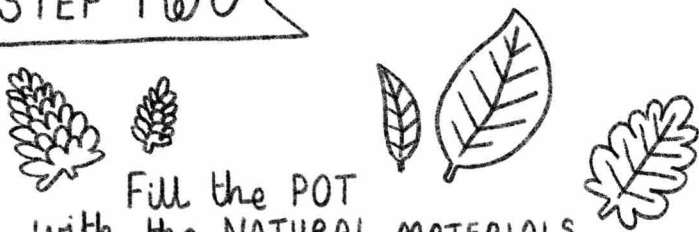

Place the plant pot onto the SAUCER so that the pot is lying on its SIDE.

### STEP THREE

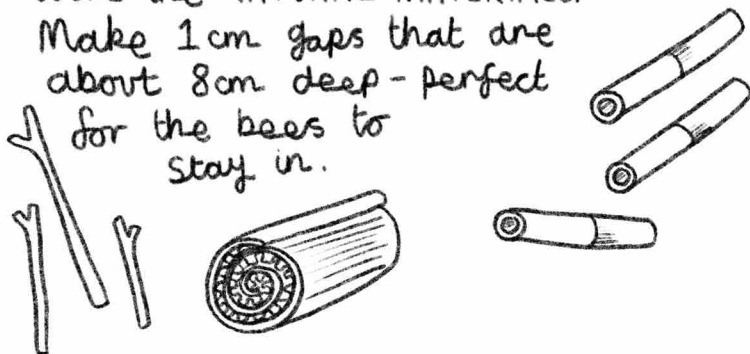

Lay the twigs onto the side of the POT to create places for other BUGS. Add the stones too.

### STEP TWO

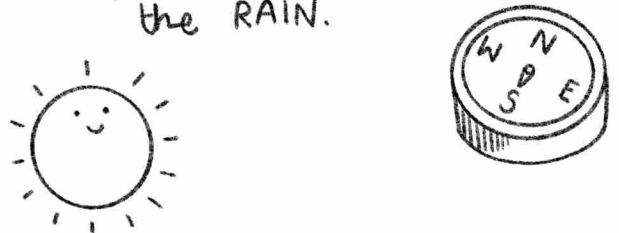

Fill the POT with the NATURAL MATERIALS. Make 1cm gaps that are about 8cm deep - perfect for the bees to stay in.

### STEP FOUR

Place the BEE HUT in a SUNNY, south-facing spot, sheltered from the RAIN.

Attract BEES to your hut by planting some bee friendly flowers such as GOLDENROD or LAVENDER.
